

## TEAM BUILDING

# Making an Impact through Team Building

Achieve Business Targets/KPI through this event

XPE Team supports organizations in achieving their business targets through team building

Is team building an event for team bonding or beyond? Many managers and business owners perceived team

building a spending for their staff retreat, but XPE Team is changing that paradigm. Over the last 3 years, XPE Team has successfully create awareness and made possible for organizations to accomplish their business targets through team building.

XPE Team which was established in 2009, is a subsidiary of a consulting arm known as Cleverbridge. Through proper research and clients' feedback, XPE Team launched a project branded as ROI Based Team Building in 2011. Whereby, the entire idea of this project is to advise clients to use Team Building to drive their people towards accomplishing challenging targets or development in the organization. To our surprise, ever since this project been our success story and we have been branded as Result Driven Team Builder.

Just to name few of our successful

KPI based Team Building Projects with MNC, GLC and SME's were:

- Retail Sales Challenge for a Hong Kong based company with 224 retail outlets in Malaysia – with total sales increased by 30% to 35% within 30 days after their project
- Sales Challenge for a GLC owned leading Malay medium newspaper company – sales increased by 95% within 3 months after the project
- Leadership Development Challenge for a local university – great improvement in leadership qualities and leaders' mindset

- Staff Commitment Challenge for Japan's leading automotive brand – great improvement in discipline, commitment and work results within 30 days after the challenge.
- Oneness Challenge for a group of companies that were newly acquired by a holding company – observed better understanding and support among managers and staff of different companies.

Since launching, we have delivered more than 30 Results Driven Team Building projects for our clients, and none of it fails.

28 Mar - Apr 2013

Our team building is certainly like any others, but we give Money Back Guarantee for Fun, Excitement and Customer Satisfaction. We ensure that all participants are made involved through our exciting Indoor and Outdoor activities. We want everyone to feel valuable in our team building projects.

However, the methodological design of XPE Team event is totally different. In all our Results Driven Team Building, we incorporate a Module called Take Back Challenge. We always recommend our clients to take-up at least a 30 Days Challenge so that the positive impacts from our

team building are transformed into change in behavior and work results at workplace. The longest challenge driven by XPE Team was 24 months challenge for our GLC client with 4 series of team building. This project was tremendously successful and we are hired to deliver again from March 2013.

Our team building is not about the event itself, but it is also about tracking the Pre and Post Team Building results. XPE Team could be the only company in the region that has developed software known as Team Building Tracking System (TTS) to track staff's

performance and results prior and after team building. Our friendly online software allows managers, group leaders and staff to provide their scores and results. With such tracking, we would be able to calculate the ROI for each team building project.

- Beside Results Driven Team Building, XPE Team do organize other types of Team Building :
- Retreat Team Building
  - Motor Hunt with Team Building
  - Safety Team Building
  - Management Team Building
  - Charity Team Building
  - Health Camp Team Building
